PROFESSIONAL SUMMARY

Computer Science student and Python developer with an engineering foundation, focused on turning ideas into working tools. Built a multi-market stock portfolio tracker, a rule-based conversational agent, and TradeMind, a market-research system using five years of Binance data. Currently completing an applied AI fluency internship covering prompt design, workflow automation, evaluation, and responsible AI practice. Seeking Python or software engineering internships where I can contribute to practical products and keep building.

EDUCATION

BSc Computer Science | *Currently enrolled*

Kadir Has University, Istanbul, Türkiye | 2024 - 2025

BSc Mechatronics Engineering | First year completed before relocating to Pakistan

The City School, Islamabad, Pakistan | 2022 - 2024

A Levels, Pre-Engineering

EXPERIENCE

Artificial Intelligence (AI) Fluency Intern, FlyRank AI | Remote | June 2026 - Present

- Completing a structured applied-AI programme covering prompt engineering, generative tooling, workflow design, evaluation and responsible AI.
- Built and tested multi-step AI workflows and a personal internship-fit agent using connected data, live research and pre-build eval cases.
- Produce workflow audits, project maps, proof statements and reusable prompt structures for repeat use across projects.

Founder, MindStack | Remote | 2026 - Present

- Building an early-stage AI startup focused on practical AI, automation and digital solutions for real business problems; launched the company's live public website.

Python Programming Intern, CodeAlpha | Remote | June 2026 - July 2026

- Delivered two complete Python applications to written specification, using functions, control flow, collections, input validation and structured program logic.
- Used Visual Studio Code, Git and GitHub to develop, version-control and publish project work.

TECHNICAL PROJECTS

TradeMind: Intelligent Market Research | Python

- Built a trading-research system using five years of Binance data and more than 172,000 candles, with probability-based signals, paper trading and backtesting that includes trading costs.
- Model accuracy reached 52.4% versus a 50.4% baseline; testing showed that higher prediction accuracy did not automatically beat buy-and-hold after fees.

Global Stock Portfolio Tracker | Python

- Menu-driven CLI for US and Pakistani stocks with input validation, holdings management, invested/current value, profit/loss, percentage return, manual price updates and portfolio summaries.

PyBot: Rule-Based Conversational Agent | Python

- Interactive rule-based chatbot using keyword matching, functions, conditionals, loops, dictionaries, input cleaning and randomised response selection; no machine learning or external APIs.

TECHNICAL SKILLS

Programming: Python; data structures; functions; control flow; string handling; calculations

Development: CLI applications; input validation; debugging; Git; GitHub; Visual Studio Code

AI & Automation: Prompt engineering; generative AI tooling; n8n workflow automation; structured outputs; response evaluation

APIs & Integration: Working with APIs and external data/services; connected-tool workflows

CERTIFICATIONS & TRAINING

- **Artificial Intelligence Fluency: Framework and Foundations**, Anthropic (July 2026)
- **Python Essentials 1**, Cisco Networking Academy (June 2026)
- **Machine Learning Terminology and Process**, Amazon Web Services (June 2026)
- **One Million Prompts: Prompt Engineering for AI**, Dubai Future Foundation (June 2026)
- **Python Programming Internship Certificate**, CodeAlpha (July 2026)

LEADERSHIP & ACTIVITIES

- **President, Student Council** | The City School: led council operations and represented the student body.
- **Head of Sports Committee** | The City School: organized the Rawalympics Cup inter-school tournament.
- **Model United Nations** | delegate and organizing team member across multiple conferences.
- **Volunteering** | twin-cities food drive serving more than 12,000 people; WWF Pakistan conservation awareness; PNCA seminar logistics.

LANGUAGES

English (Fluent) | Urdu (Fluent) | Punjabi (Fluent) | Turkish (Basic)
